

Commander 6B

with cradle "Digital"

Functionality via cradle Digital

- Easy and complete TETRA control for Motorola MTM5000 series and Sepura SRG3900/SCG22
- Group selection via MRT folder structure, Sepura numbers or alphabetic list
- Automatically generated folder with the 15 most recently used groups (DMO+TMO together)
- Status texts can be displayed in separate colors for easy recognition

Features - cradle Digital

- Direct connection from cradle Digital to the radio
- Option for standardized pre-installation up to the radio location (adapter decides which radio can be used)
- Power-on (incl. MRT) via switch on the rest or via external main switch
- Connection of additional data applications via internal PEI multiplexer

Accessory connectors:

- microphone
- loudspeaker
- external PTT
- GPIOs
- warning system
- ext. PEI application

Under development

- Support for DMR radios
 - Motorola DM 4600
 - Hytera HM785
 - Kenwood 5000er Serie
 - Icom IC-F6400
- Voice recorder (selling feature)
